

## Spirituality...

We respond to the needs of the natural environment and all of creations by connection to build the Balance Life.

Divine energy flows within each of us, as we allow God to work through us and allow God's mercy to touch those who need God most by being responsive and empathetic, dare to leave the ego to be able to serve and respond the situations and needs of others around.

Our ministry is related to the natural and social environment, by realizing the importance of respecting life related to the environment and social. With the motto that every person is more valuable than the whole world, we are called to work with those who are marginalized

But in order to do this, we must reconcile our relationship with our own selves, with God, with others and with nature. Continue to learn and to realize our whole existence and need, both physically, emotionally, spiritually and to influence the environment.

# Transformation

The marginal people  
and the neglected  
Earth
